EDITORIAL NOTE.

This bibliography is intended to embrace the important publications of present members of the Faculties of The George Washington University (formerly Columbian) and of graduates of the University on whom have been conferred the degrees of Ph. D. and D. C. L. The books and papers mentioned may be classified in general as contributions to philological, historical, mathematical, physical, medical, economic, and legal science, but it has been thought best to arrange the list alphabetically according to the names of the authors. The information given has been furnished by the authors themselves. The abbreviations used are current in scientific publications, but for convenience a list of those occurring most frequently is appended. The order of statement adopted in the case of books is title, place, publisher, date, number of pages; in the case of contributions to periodicals, title of paper, periodical, volume, series, pages inclusive, date, etc. (*e. g.*, Am. J. Arch., 8 [2], 88–91; 1904). These pages have been prepared under the editorial supervision of Professor Carroll, with the assistance of Professors Munroe, Phillips, and Vance.

BIBLIOGRAPHY.

ABBE, CLEVELAND, A. M., LL. D, Professor of Meteorology (1884–).

The Annual Parallax of Sirius from Observations at the Cape of Good Hope. Monthly Notices Roy. Astr. Soc., 1866.

On the Distribution of Nebulæ in Space. Ib., May, 1867.

Inaugural Report, June 30, 1868; First Ann. Rept., May 1, 1869; 2d An. Rep., June, 1870, of the Director of the Cincinnati Observatory.

Daily Weather Bulletin of the Cincinnati Observatory, Sept. 1, 1869, to Nov. 30, 1869. Daily Weather Bulletin of the Western Union Telegraph Company, Dec. 1, 1869, to Nov. 1, 1870. (This was the beginning of regular "probabilities" of the weather.)

Latitude and Longitude of Cincinnati. Colton's J. of Geog., Jan., 1871.

The Portable Transit Instrument in the Vertical of the Pole Star. Navy Department, Washington, 1870.

The Repsold Portable Vertical Circle. Am. J. Sc., **43**, [2], 207; 1867.

On the Connection Between Terrestrial Temperature and Solar Spots. Am. J. Sc. **1**, [3], 345-347.

Determination of the Altitudes of Signal Service Stations. Report of Dec., 1872, to the Chief Signal Officer.

Remarks on a Table of Fifty Balloon Voyages by S. A. King. Bull. Phil. Soc., Washington, **1**, 1871.

The Relative Direction of Motion of Winds, Lower Clouds, and Upper Clouds. Dated May, 1872. Mo. Weather Rev., Nov., 1878.

Charts Showing Storm Frequency, Winds, Isobars, and Temperature. Walker's Statistical Atlas. Washington, 1874.

Observations on the Tail of Coggia's Comet. Astron. Nachr., **84**, 353-4.

The Very Much Extended Nebulæ of Sir John Herschel's General Catalogue. Am. J. Sc., **3**; 1875.

The Aurora of April 7, 1874. An. Rep. Chief Sig. Officer, 1874, 383; 1875, 367; 1876, 301.

Report of the Committee to Collect Information Relative to the Meteor of Dec. 24, 1873. Bull. Phil. Soc. Washington, **2**, 139.

Short Memoirs on Meteorological Subjects. (Translations) Smith. Inst. Rep. for 1877, 377.

The Influence of Temperature on the Hatching of Locust Eggs. First An. Rep. U. S. Entomological Commission, 423; 1877.

Report on the Percentages of Verification of the Predictions of European Storms as published in the New York Herald. Dated Feb., 1879. Published in the London Times in full. March, 1879.

Predictions of the General Probabilities of Fair Observing Weather during the Transit of Mercury, May 8, 1878, and during the Total Solar Eclipse July 28, 1878. Washington, April, 1878.

First Report on Standard Time, as Chairman of the Special Committee of the American Metrological Society. Proc. Am. Metr. Soc., **2**, 17; May, 1879. (This was the beginning of the movement in favor of standard time.)

Report on the Solar Eclipse of July 28, 1878. An. Rep. C. S. O., 1880. Reprinted as Professional Papers, U. S. Signal Service, no. 1.

The Red Sunset Skies of 1884 and 1885. Am. Met. J., April, 1889.

A Correction for Gravity in the Use of Refraction Tables. Astron. Nachr, **116**; Dec., 1886.

The Effect of Exposure to the Wind upon Barometric Readings. Mo. Weather Rev., Nov., 1886; Nature, **35**, 29-30.

ABBE, CLEVELAND (Cont'd).

The General Bibliography of Meteorology and Terrestrial Magnetism. Brit. Asso. Adv. Sc., 593-594; Aug., 1887.

Treatise on Meteorological Apparatus and Methods. An. Rep. C. S. O., part 2; 1887.

The Determination of the True Amount of Precipitation and Its Bearing on Theories of Forest Influences. Read Nov. 24, 1888, before the Phil. Soc. Washington. Published in full May, 1893, as appendix no. 1, Bull. no. 7 of the Forestry Division.

The Signal Service Bibliography of Meteorology. Bull. Phil. Soc. Washington, Oct. 29, 1887, **10**, 20.

Recent Progress in Dynamic Meteorology. Smith. Inst. Rep. 1888, 355.

Remarks on the Viscosity of the Earth and the Origin of its Internal Heat. Bull. Phil. Soc. Washington, **2**, 533; 1889.

Preparatory Studies for Deductive Methods for Storm and Weather Predictions. Ann. Rep. C. S. O., 1889, part 2, Washington, 1890.

The Rollers of Ascension and St. Helena. Nature, **41**, 585; 1890.

Cloud Observations at Sea, or Meteorological Work and Results Accomplished on the U. S. Scientific Expedition to the west coast of Africa. Am. Met. J., Oct., 1891, **8**, 250.

A New University Course. Atlantic Mo., 16-25, Feb., 1891.

The Mechanics of the Earth's Atmosphere (translations). Smithsonian Miscellaneous Contributions, no. 283, Feb., 1893, 2d ed., May, 1893.

Atmospheric Radiation of Heat and Its Importance in Meteorology. Am. J. Sc., May, 1892, **68**, 364.

Jonathan Homer Lane. Biographical memoir.

William Ferrel. Biographical memoir. Nat. Acad. Sc., Biographical Memoirs, vol. 3.

The Production of Rain. Frear's Agr. Sc., **6**, 297; 1892.

The Mauritius Hurricane of April 29, 1892. Am. Met. J., **9**, 360.

Ice Columns in Gravelly Soil. Ib., **9**, 523; 1893.

The Marine Nephoscope and Its Usefulness to the Navigator. Chicago Meteorological Congress. Weather Bureau Bulletin 11, 161; 1893.

Relations of Geodesy and Meteorology; the Deficit of Gravity in the Interior of Continents. Am. Met. J., **11**, 1.; 1894.

Meteorological Problems for Physical Laboratories. Ib., **12**, 7-11; 1895. Reprinted in Nature, June, 1895.

Theories of the Origin of Atmospheric Electricity. Mo. Weather Rev., 1898. Reprinted in Nature.

Aims and Methods of a State Weather Service. Report of the Maryland State Weather Service, **1**, 219-328; 1899.

Meteorology. The Times Supplement to the Encyclopedia Britannica, Dec., 1902.

Physical Basis of Long Range Forecasts. Mo. Weather Rev., Dec., 1901.

Report of the Advisory Committee on Meteorology. Dated June, 1902. Yearbook of the Carnegie Institution, **1**, 76-82.

NOTE.—In addition to these independent publications, Professor Abbe has been editor or co-editor of the Bulletin of the Philosophical Society of Washington (1873-1880), the Monthly Weather Review (1873-), the Bulletin of the International Meteorological Association (1874-1889), and the American Meteorological Journal (1884-1896), and numerous shorter articles appear in these periodicals.

American Fishes. A popular treatise upon the game and food fishes of North America, with special reference to habits and methods of capture, by G. Brown Goode, Ph. D., LL. D. New edition completely revised and largely extended by Theodore Gill, A. M., M. D., Ph. D., LL. D. With numerous illustrations, including a series of new color plates. Boston: Dana, Estes & Co., 1903.

NOTE.—The above is a partial list of the publications of Professor Gill, including only such articles as contain the expression of original views respecting taxonomy or nomenclature that have been since adopted by naturalists generally. Much work has been published also in connection with Johnson's Universal Encyclopedia, The Century Dictionary, The Standard Dictionary, and minor publications. Numerous reviews have also been contributed to The Nation, The Critic, and Science, of New York, as well as to other periodicals. A complete bibliography of Professor Gill's contributions to knowledge is in preparation. Many of the above publications have been published separately, with independent pagination and title page. The numbers on the right in brackets, at the end of references, are those in the lists in the catalogue of scientific papers compiled by the Royal Society of London and covering the period from 1800 to 1883.
